NOTICE TO THE MARKET

OPERATIONAL DATA – NOVEMBER 2023

Brisanet Participações S.A. (B3: BRIT3) (“Brisanet”, “Company”), the largest fixed broadband provider in the Northeast region, according to the Anatel¹ ranking, today announces operational data for the month of **November 2023**.

Founded 25 years ago, **Brisanet** has a product portfolio practically 100% in optical fiber and operations focused on the Northeast region of the country. The Company also operates through its **Agility Telecom (Agility)** brand, which provides internet services under the franchise model.

At the end of November 2023, the Company served **1,279,590 customers** in all 9 states of the Northeast region – Ceará, Rio Grande do Norte, Paraíba, Pernambuco, Alagoas, Piauí, Sergipe, Maranhão and Bahia – ahead of **7.0 million households in 158 cities**.

In November, **10.1 thousand HPs were added**. Until the end of 2023, the pace of monthly FTTH expansion will be further reduced as the Company will focus on expanding infrastructure in the 4G/5G mobile business.

The organic growth of the customer base in November was 12.4 thousand.

The Brazilian economic scenario, especially in the region where we operate, remains challenging. Inflation and the pricing strategy adopted by competitors continue to put pressure on the telecommunications market.

Brisanet continues to advance in capitals and metropolitan regions, with fiber **market share between 50 and 70% in Natal, Maceió and João Pessoa**, and **above 20% in Fortaleza**. Teresina and Aracaju, capitals where the Company entered in mid-2021, market share is already above 15% in the Piauí and **above 20% in the Sergipe** (figures from Oct-23).

Through Agility, the Company provides services to more than **185 thousand customers** in 5 states in the Northeast – Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas – with 70 franchisees, **servicing 782 thousand homes**.

Agility continues to undergo changes and strategic adjustments in some partners and in the admission of new franchisees, always aiming for the sustainable and economic growth of the partnership. The idea is that franchisees will participate in the 5G operation, in a model still being formatted.

Considering both bases, **the Company serves almost 1.5 million customers throughout the Northeast.**
